# GOT THE NEED FOR SEED?

## YOUR PATH TO LUSH, VIBRANT GRASS

The AeraSeeder is designed for anyone who needs reliable results—fast. Whether you're a professional groundskeeper or managing a rental fleet, the AeraSeeder is key to efficient seeding or overseeding across a variety of turf.

At the core of the system are unique spiked rollers which dimple the soil. These dimples increase the surface area improving the seed-to-soil contact and boosting germination rates.

With multiple size options, a handy seed calibration tray, and an easy-to-use design, the AeraSeeder isn't just built tough—it's built to transform turf. Whether you're tackling sprawling sports fields or fine-tuning your backyard lawn, this rugged machine delivers pro-level results with rental-friendly simplicity. It's the no-fuss, all-function solution for anyone who wants lush, resilient grass without breaking a sweat.

# TRUSTING THE PROCESS

1

## SPIKED ROLLER

The spiked roller creates dimples in the soil effectively increasing the exposed soil surface. Made up of individual rings, they can rotate at different speeds eliminating damage to the turf as the unit is maneuvered.

2

## SEED RATE

Adjustable opening's inside the hopper allows operators to easily manage the application rate of the seed.

3

## BRUSH

The built in brush sweeps seed off the grass helping it settle into the soil for better contact and improve germination.

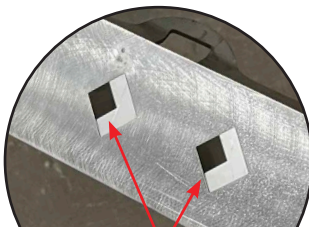

4

## REAR ROLLER

A smooth rear roller closes the dimples while pressing the seed firmly into the soil to increase germination. An optional rear spiked roller increases the dimples from 800 per sq. yd. to 1700.

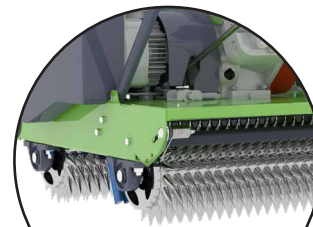

800 dimples sq. yd.

Floating brush

Optional rear spike roller

## SEGMENTED ROLLER

Each cone has a unique shape which easily penetrates the ground and pulls out cleanly.

The spiked roller is turf friendly. Made up of individual rings it turns easily without scrubbing the turf.

## OVERSEED WITH EASE

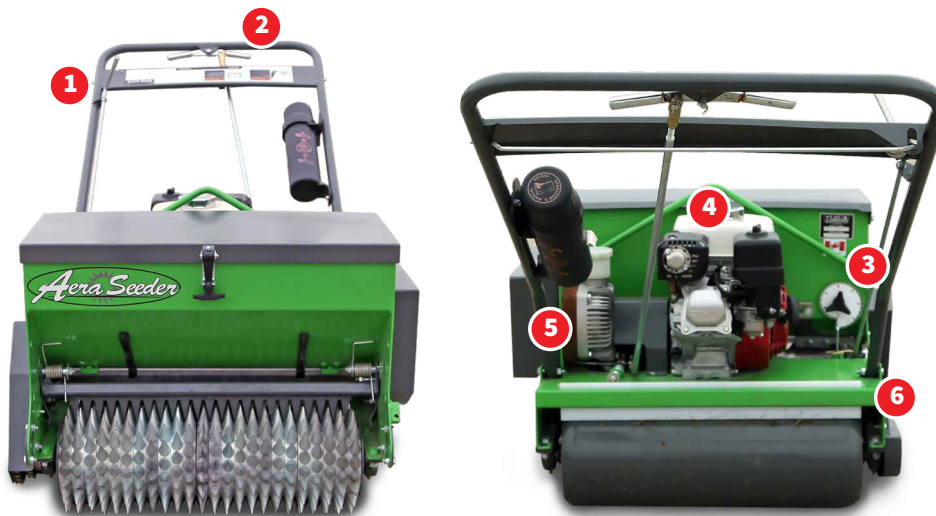

The self-propelled walk behind AeraSeeder is the solution for accurate initial and overseeding in those 'hard to get at' places. This powerful little machine is ideal for both turf managers and landscapers looking to satisfy the pickiest clients.

The self-propelled models come in 18" and 24" widths, ideal for getting through most backyard gates under the power of a reliable Honda engine. A hydrostatic transmission provides forward and reverse control of the AeraSeeder for easy operation.

The 24" seeding width creates approximately 850 dimples per square yard, saturating the ground with a network of holes. Addition of the optional second spiked roller doubles the dimples.

## FEATURES

- 1 Manual seed gate
- 2 Forward Reverse controls
- 3 Seed rate adjustment
- 4 Honda motor
- 5 Eaton hydrostatic drive
- 6 Smooth roller scraper

## GAUGE WHEEL KIT

- 2" wide x 8" diameter solid rubber wheels
- Adjustable stop to control depth of penetration on front spike roller

## 4" WIDE GAUGE WHEEL (UPGRADE)

- 4" wide x 8" diameter UHMW plastic wheels (one pair)
- Wheels only (requires gauge wheel kit)

## WEIGHT BRACKET (SELF-PROPELLED ONLY)

- Holds two 45 pound weights

## 45-POUND WEIGHT

- Weights may be added to aid penetration in compact or hardened soils

## REAR SPIKED ROLLER (SELF-PROPELLED ONLY)

- Additional spiked roller increases perforations to 1,700 per square yard

# 3-POINT HITCH

## LARGE SCALE EFFICIENCY

Ideal for larger applications our 3PH series of AeraSeeder is the ideal tool for discerning professionals demanding quality in groundskeeping. An optional tow kit makes the 48" model ideal for rental shops and small compact utility vehicles that have no 3PH.

It's tandem rollers pivot 30 degrees to maintain consistent ground contact along the path of travel as well as across the width of the roller.

3PH models are equipped with internal baffles to ensure even seed delivery across their wide widths. They also come equipped with hydraulic on/off controls for seed delivery.

## FEATURES

- 1 Hydraulic seed gate
- 2 Seed rate adjustment
- 3 Seed level indicator
- 4 Suitcase weight bracket
- 5 Smooth roller scraper
- 6 Seed calibration tray

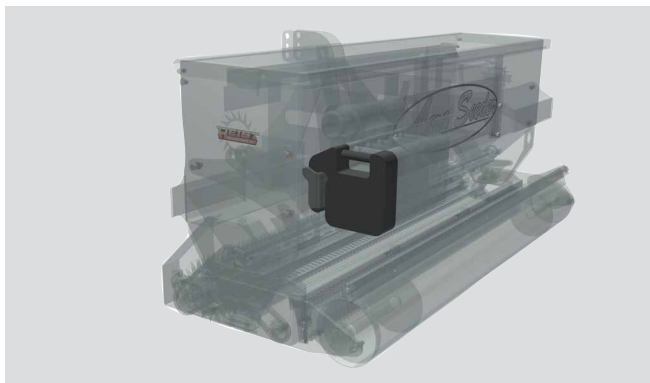

### FRONT

### REAR

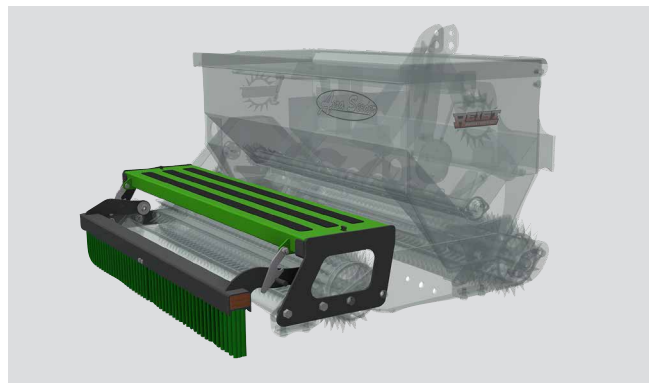

# OPTIONS

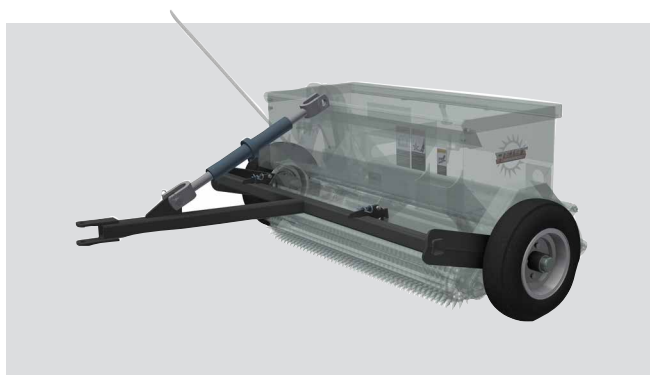

## 45-POUND WEIGHT

- Suitcase style weight

## REAR SPIKED ROLLER EXTENSION (48, 72, & 96)

- Extends rear-spiked roller and brush back 7" for optimum ground contact and smoother operation
- Stand-on platform for easy loading of hopper

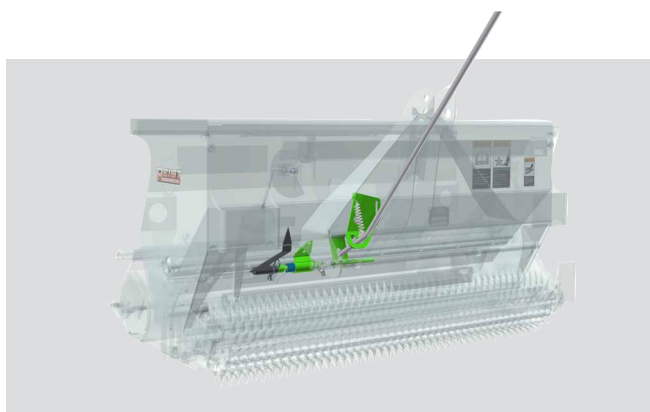

## TOW DOLLY (48" ONLY)

- Manual ratchet jack to raise and lower AeraSeeder on cart
- Cart attaches quickly to three-point hitch mounts on AeraSeeder

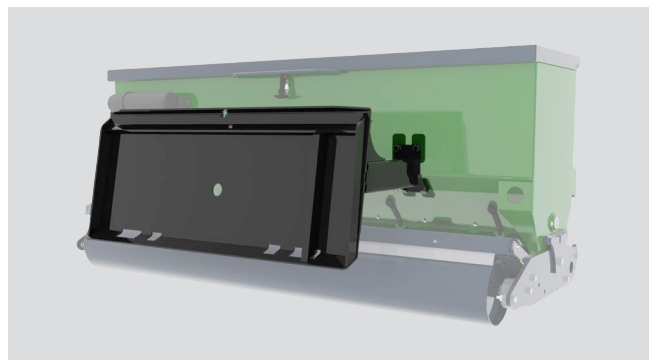

## TOOL BARS- TWO OR THREE AERASEEDERS (48 & 72 MODELS)

- CAT II Hitch
- Hydraulic control for seed slide opener

## MANUAL SEED SLIDE SHUT-OFF (48" ONLY)

- Comes standard with hydraulic shut off
- Manual shut off is for tractors without hydraulic remotes

## SKID STEER HITCH

- Bolt on hitch adds skid steer compatibility to (60", 72", 96")
- Bolt on hitch for mini skid applications (48")
- To be used in forward motion/push
